About:

Argyle Cheese Farmer currently produces 8 varieties of Hard Cheeses & Curd. The milk is sourced from one of the owner's farm, Ideal Dairy Farms. This natural whole milk comes from a herd of 250 cows that produce milk with only the A2 protein. Some people find this type of milk easier to digest. All of the whole milk is vat pasteurized before cheese is made.

**Expect to see a full lineup of
cheeses in the coming months to
Red Barn Produce.**

the People:

Our Argyle Cheese Farmer team includes about 25 individuals each with their own talents and roles. Our cheesemakers are a small but mighty team, with lots of experience working with our products and the intricacies of our dairy processing. Our commercial kitchen boasts several cooks and bakers with an endless capacity to create deliciousness using many of our dairy products. Our retail team has a diverse skill-set that expands far beyond their friendly nature and attentiveness to customers. While they are the “face” of our store there are many things they do behind the scenes to ensure our success.

Many of these important team members are family and close friends! It truly is a team effort, everyone pitches in to bring our customers the quality and experience they have come to expect from Argyle Cheese!
